Care everywhere

The evolution and impact of treating patients beyond hospital walls

Care everywhere will provide you with a thorough look at how care is shifting across and between different sites-of-care—and the impact these shifts have on the larger healthcare industry.

Course learning objectives: Identify the five most prominent site-of-care shifts currently taking place in healthcare, understand the drivers and factors behind continued shifts, and examine this trend's impact on key healthcare industry stakeholders.

Course modules

01 **Back to basics: An explanation of the 5 site-of-care shifts**

An overview of what “site-of-care shift” means, as well as the five most prominent site-of-care shifts taking place in healthcare today.

Module learning objectives

Define “site-of-care” and “site-of-care shift”, identify the five key site-of-care shifts poised to impact the healthcare industry, including understanding the “traditional” sites of care, and recall patient-centered examples of site-of-care shifts.

02 **Drivers moving care away from traditional settings**

A look at the “how” and “why” behind site-of-care shifts, including both national drivers that initiated site-of-care shifts and local drivers that have since accelerated site-of-care shifts.

Module learning objectives

Understand the major drivers that have brought us to where we are today with site-of-care shifts and recognize that different types of care and different markets observe site-of-care shifts at different rates.

03 Opportunities and risks provider organizations face with site-of-care shifts

A look at how each of the five key site-of-care shifts are impacting provider organizations, particularly hospital systems.

Module learning objectives

Understand the impact each of the five site-of-care shifts has on provider organizations and their businesses and describe the strategic actions we expect providers to take as a result.

04 Impacts of shifts in care sites on non-provider stakeholders

A look at how site-of-care shifts in general are impacting non-provider healthcare stakeholders, including payers, patients, and supplier and digital health companies.

Module learning objectives

Understand both the positive and negative impacts of site-of-care shifts on key healthcare industry stakeholders, and the strategies and tactics each is employing in response.
