

Healthgrades Outstanding Patient Experience Awards

Healthgrades publishes patient experience ratings and patient experience awards yearly

Patient Experience Ratings Methodology

- 1 Healthgrades classifies all hospitals into four categories based on their number of beds, cohort size (the number of conditions and procedures evaluated by Healthgrades), teaching status, and location.
- 2 Using HCAHPS survey data, Healthgrades rolls up the results from 21 patient experience questions into nine patient experience measures (see chart below).
- 3 Healthgrades compares how each hospital compares to all other hospitals in their group for each of the nine patient experience measures. This is measured as a z-score.
- 4 Finally, Healthgrades creates a weighted average of each hospital's HCAHPS z-scores. Two measures — surveying the patient's overall experience and if they would recommend the hospital to friends or family — are weighted greater than the other measures.

Data Source

- Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) survey data
 - The 32-question survey is administered to a random sample of adult patients across all types of medical conditions between 48 hours and 6 weeks post-discharge. Surveys are not restricted to Medicare beneficiaries.
 - CMS performs adjustments on survey data to account for survey method (via phone or mail) and the characteristics of patients.
- Data for the 2019 Healthgrades ratings was based on HCAHPS survey data released in October 2018 (covering patients discharged between January 2017 and December 2017).

Outstanding Patient Experience Awards Designation Criteria

To be eligible for Healthgrades' Patient Experience Excellence Award, a hospital must have data for at least 100 HCAHPS surveys. In addition, the hospital must be in the top 80% for clinical quality as measured by a volume-weighted z-score across all conditions and procedures that Healthgrades measures using Medicare data (in a separate quality evaluation). Hospitals with HCAHPS scores but no Healthgrades quality rating are eligible, but grouped together along with other hospitals with no analyzed cohorts.

To designate award recipients, Healthgrades lists hospitals in each of the four hospital categories by their overall patient experience score. Hospitals in the top 15% of their respective categories are labeled Outstanding Patient Experience Award recipients.

In 2019, Healthgrades awarded 434 hospitals its Outstanding Patient Experience Award.

Patient Experience Measures Included and Weight

Measure Included	Measure Summary	Weight
Overall Rating	How do patients rate the hospital overall?	25%
Recommendation to Family/Friends	Would patients recommend the hospital to friends and family?	25%

1) Centers for Medicare and Medicaid
