LEGAL CAVEAT

Advisory Board has made efforts to verify the accuracy of the information it provides to members. This report relies on data obtained from many sources, however, and Advisory Board cannot guarantee the accuracy of the information provided or any analysis based thereon. In addition, Advisory Board is not in the business of giving legal, medical, accounting, or other professional advice, and its reports should not be construed as professional advice. In particular, members should not rely on any legal commentary in this report as a basis for action, or assume that any tactics described herein would be permitted by applicable law or appropriate for a given member's situation. Members are advised to consult with appropriate professionals concerning legal, medical, tax, or accounting issues, before implementing any of these tactics. Neither Advisory Board nor its officers, directors, trustees, employees, and agents shall be liable for any claims, liabilities, or expenses relating to (a) any errors or omissions in this report, whether caused by Advisory Board or any of its employees or agents, or sources or other third parties, (b) any recommendation or graded ranking by Advisory Board, or (c) failure of member and its employees and agents to abide by the terms set forth herein.

Advisory Board and the "A" logo are registered trademarks of The Advisory Board Company in the United States and other countries. Members are not permitted to use these trademarks, or any other trademark, product name, service name, trade name, and logo of Advisory Board without prior written consent of Advisory Board. All other trademarks, product names, service names, trade names, and logos used within these pages are the property of their respective holders. Use of other company trademarks, product names, service names, trade names, and logos or images of the same does not necessarily constitute (a) an endorsement by such company of Advisory Board and its products and services, or (b) an endorsement of the company or its products or services by Advisory Board. Advisory Board is not affiliated with any such company.

IMPORTANT: Please read the following.

Advisory Board has prepared this report for the exclusive use of its members. Each member acknowledges and agrees that this report and the information contained herein (collectively, the "Report") are confidential and proprietary to Advisory Board. By accepting delivery of this Report, each member agrees to abide by the terms as stated herein, including the following:

1. Advisory Board owns all right, title, and interest in and to this Report. Except as stated herein, no right, license, permission, or interest of any kind in this Report is intended to be given, transferred to, or acquired by a member. Each member is authorized to use this Report only to the extent expressly authorized herein.
2. Each member shall not sell, license, republish, or post online or otherwise this Report, in part or in whole. Each member shall not disseminate or permit the use of, and shall take reasonable precautions to prevent such dissemination or use of, this Report by (a) any of its employees and agents (except as stated below), or (b) any third party.
3. Each member may make this Report available solely to those of its employees and agents who (a) are registered for the workshop or membership program of which this Report is a part, (b) require access to this Report in order to learn from the information described herein, and (c) agree not to disclose this Report to other employees or agents or any third party. Each member shall use, and shall ensure that its employees and agents use, this Report for its internal use only. Each member may make a limited number of copies, solely as adequate for use by its employees and agents in accordance with the terms herein.
4. Each member shall not remove from this Report any confidential markings, copyright notices, and/or other similar indicia herein.
5. Each member is responsible for any breach of its obligations as stated herein by any of its employees or agents.
6. If a member is unwilling to abide by any of the foregoing obligations, then such member shall promptly return this Report and all copies thereof to Advisory Board.

Examining Social Determinants of Health

An executive discussion on the role
of hospitals and health systems

Undeniable impact on health

Consequences associated with unaddressed social determinants of health

\$155 billion

Annual U.S. health system costs due to **food insecurity**

16 years

Decrease in life expectancy across **six mile stretch** in Chicago neighborhoods

\$2,320

Per capita annual health system costs due to **housing instability**

5X

Higher risk of developing mental health conditions due to **exposure to violence and feeling unsafe** during childhood

2X

Increased risk of developing coronary artery disease due to **social isolation**

2X

Higher death rate for individuals **unemployed** for more than six years

Two different perspectives on addressing SDOH¹

STAT

“Taking Care of Charlie Helped One California Town Nearly Halve Hospital Use”

by Lauran Hardin and Shelly Trumbo

- Clearlake, California implemented a county-wide project to provide comprehensive care to the community
- Project Restoration was a collaborative effort involving local organizations including health agencies, law enforcement, nonprofits, and faith organizations
- Project Restoration converted a local motel into transitional housing, called Restoration House
- Within one year, Clearlake experienced the following results among the high-use population:
 - 44% reduction in hospital utilization
 - 82% reduction in community response system use
 - 45% reduction in hospital costs

Forbes

“Social Determinants Of Health: Holy Grail Or Dead-End Road?”

by Lisa Fitzpatrick

- Headlines portray SDOH as the “Holy Grail” of improving health outcomes among the poor
- But research finds that interventions are only successful with long-term commitment to addressing deep-rooted social and cultural challenges, such as:
 - Food insecurity challenges are compounded by low food literacy and ingrained community palates
 - Financial needs can conflict with health needs (e.g., inability to miss work to attend a doctor’s appointment)
- Interventions perceived as condescending are unlikely to be embraced by the community

1) Social determinants of health.

Source: Hardin L and Trumbo S, “Taking Care of Charlie Helped One California Town Nearly Halve Hospital Use,” *STAT*, April 2019; Fitzpatrick L, “Social Determinants of Health: Holy Grail or Dead-End Road?,” *Forbes*, November 2018; Health Care Advisory Board interviews and analysis.

Defining social determinants of health

Much more to health than health care

Six domains of social determinants of health

Economic stability

- Employment
- Income
- Expenses
- Medical bills
- Support

Neighborhood and physical environment

- Housing
- Transportation
- Safety
- Parks
- Playgrounds
- Walkability
- Zip code / geography

Education

- Literacy
- Language
- Early childhood education
- Vocational training
- Higher education

Food

- Hunger
- Access to healthy options

Community and social context

- Social integration
- Support systems
- Community engagement
- Discrimination
- Stress

Health care system

- Health coverage
- Provider availability
- Provider linguistic and cultural competency
- Quality of care

Social determinants of health in the spotlight

News coverage expanding from trade publications to mass media

STAT

April 30, 2019

“We need a national conversation about health—not just about health care”

Reuters

March 7, 2019

“Homing in on health: U.S. homeless prescribed safe, stable housing”

The Wall Street Journal

September 16, 2018

“Health Care Looks Beyond Medicine to Social Factors”

The Economist

September 1, 2018

“Loneliness is a serious public-health problem”

Modern Healthcare

August 25, 2018

“Hospitals tackling social determinants are setting the course for the industry”

NBC

March 28, 2018

“Is your neighborhood hurting your health? Here’s how to change it.”

Here’s How to Change It.” *NBC News*, March 28, 2018; Johnson SR, “In Depth: Hospitals Tackling Social Determinants Are Setting the Course for the Industry,” *Modern Healthcare*, August 25, 2018; Biron CL, “Homing in on Health: U.S. Homeless Prescribed Stable, Safe Housing,” *Reuters*, March 7, 2019; Gormley B, “Health Care Looks Beyond Medicine to Social Factors,” *The Wall Street Journal*, September 16, 2018; Health Care Advisory Board interviews and analysis.

Clarifying providers' motivations

Variety of factors bringing social determinants to the forefront

1

Responding to regulatory and legal pressures

- ACA requires non-profit hospitals to conduct Community Health Needs Assessments every three years
- Many states require Medicaid managed care organizations to screen and refer for social needs
- Congress and state governments increasing scrutiny of tax-exempt status

2

Transforming the business model

- Medicare, Medicaid, and direct-to-employer ACO models increasingly popular
- CMMI grants focused on addressing social determinants of health
- Specialized primary care models target the chronically ill population
- Medicare Advantage plans recently permitted to cover non-medical benefits

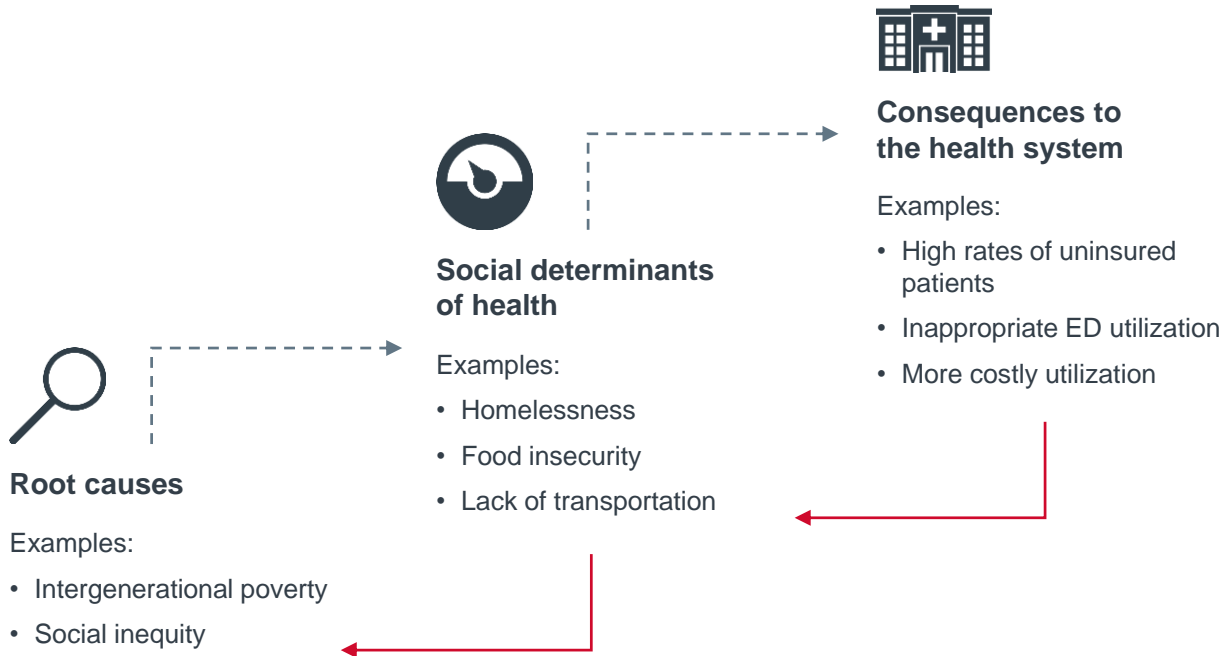

3

Harnessing new capabilities

- Hospitals and health systems are significant influencers in their communities
- Technology improves ability to track, facilitate, and coordinate efforts
- Variety of organizations now available to create mutually beneficial partnerships

Three potential ambitions for providers

Focusing on consequences alone likely insufficient

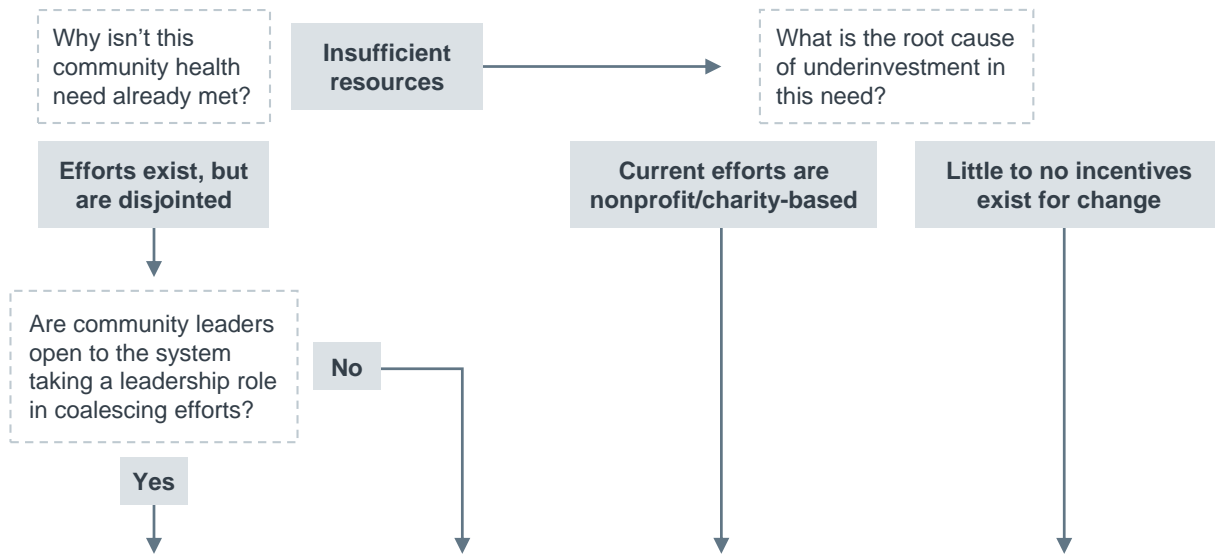

LONG TERM

MEDIUM TERM

SHORT TERM

Multiple avenues to drive impact

Decision guide for health systems' role in community health interventions

CONVENER

Gather a range of cross-industry stakeholders, drive collaboration between existing organizations

FUNDER

Devote significant resources, staff, or financial aid to partnerships and community health programming

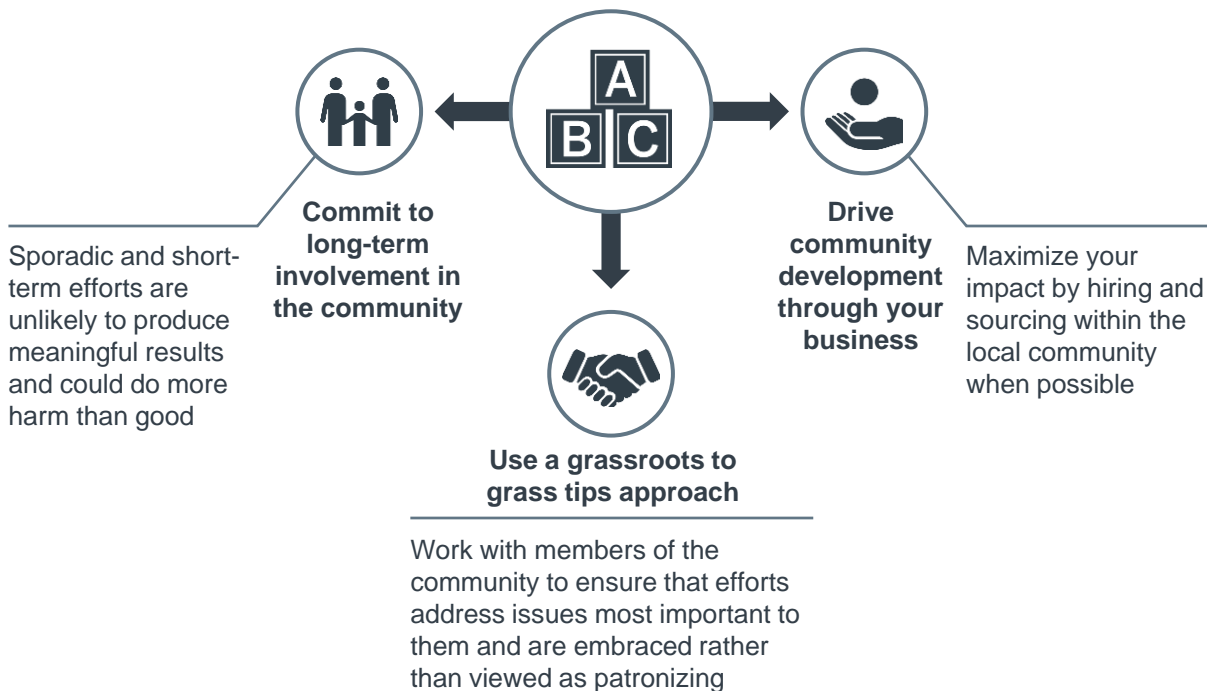

LEADER

Use institutional scale to drive change by building a program or advocating for policy change

Charting the path forward

Three key principles to maximize impact and avoid missteps

Key takeaways

- 1 Aim to address the root causes of the problem: poverty and inequity.**

Ad hoc investments and short-term initiatives will only put a band-aid on problems, not heal them. They are also unlikely to show positive financial or clinical return on investment.
- 2 Get away from four-quarter planning and decision-making.**

True transformation occurs over decades. Structural challenges rooted in longstanding barriers can only be addressed with a long-term strategy.
- 3 Approach planning from grassroots to grass tips.**

The community voice must have a permanent seat at the table to identify root causes, help build initiatives, and make decisions about where to invest. Providers should play supporting roles when other stakeholders are better positioned to lead, which helps build positive perception in the community.
- 4 Assign accountability to a senior executive.**

Advanced institutions assign oversight to a C-suite executive. This may be an existing leader or a newly created role such as a Chief Community Health Officer or Senior Vice President of Community Health.
- 5 Plan for blowback amid disruption.**

Much of the work in addressing social determinants of health is about changing perceptions, and there will likely be misunderstandings along the way. Amid conflict, assume positive intent, be flexible, and get creative.
- 6 Walk the walk by making significant internal change.**

Transformation starts within the organization by accelerating diversity, equity, and inclusion in leadership, hiring locally and creating career paths, incorporating human-centered measures that matter to the community into performance improvement goals, and purchasing supplies locally when possible.
